

CampusCE Corporation: Vendor Profile

CampusCE has been providing Educational Management System solutions since 2002, we deliver our services via a Cloud-Based, Software as a Service (SaaS) subscription model. Customer's budget for a one-time implementation and licensing fee, and a recurring usage fee which provides several distinct advantages compared to traditional own-server, self-managed, enterprise software.

- ▶ No capital expenditures for equipment – no computer hardware, networking equipment or software systems to purchase up front.
- ▶ By outsourcing these tasks, organizations can focus on what they do best, while guaranteeing service-uptime, reliability, and safety.
- ▶ Dramatically reduced IT department support time.
- ▶ IT staff can focus on how your organization's hardware, processes and workflow works and communicates.
- ▶ No additional information technology resources required – no additional set up, monitoring and support personnel are required.
- ▶ Up-to-date Technology – new and improved versions can be delivered without service calls or additional support from your IT staff.

We provide flexible deployment options that allow our customers to start using their chosen solutions rapidly and incrementally minimizing the time required to get their organization enjoying the benefits of the system and an immediate return on their investment. Our team uses lean six sigma best practices to deliver an implementation plan through best of breed component solutions. Further, for institutions that are concerned with data-accessibility, CampusCE is capable of providing direct access to its data tables through its unique ad-hoc data-warehousing and business intelligence tools, built on MS Cube technology.

Our solutions are designed to automate and streamline educational management processes, reduce operating costs, improve internal controls, and empower the organization to apply greater insight into the key metrics which drive the organization's ability to attain its goals.
